COMPACT
HYDRAULIC EXCAVATOR

WALK-AROUND

Performance and Versatility

- Komatsu HydrauMind hydraulic system
- Automatic load sensing two-speed travel
- Standard auxiliary hydraulics
- Integrated counterweight and tight tail swing

Operator Comfort

- Large operator platform
- Pilot proportional joystick controls
- Large monitor panel
- Easy entry and egress
- Low noise

Service and Maintenance

- Wide opening engine hood and side covers
- Side-by-side radiator and oil cooler are easy to inspect and clean.
- Extended lubrication and engine oil replacement intervals reduce maintenance and down time.
- Tilt-forward operator's station provides full access to engine.

OPERATING WEIGHT

PC18MR-3	1,780 kg	3,920 lb
PC20MR-3	2,160 kg	4,760 lb
PC27MR-3	2,890 kg	6,370 lb
PC30MR-3	3,140 kg	6,920 lb
PC35MR-3	3,580 kg	7,890 lb
PC45MR-3	4,760 kg	10,490 lb
PC55MR-3	5,160 kg	11,380 lb

Value, Durability, and Strength

- High strength X-track frame
- Castings are used for boom foot, tip, and swing yoke.
- Single large diameter swing pin
- Three track options: rubber, steel, and Roadliner
- O-ring face seal hydraulic fittings
- Moisture/dust resistant electrical connectors.

General Features

- Two-post ROPS canopy or ROPS cab
ROPS (ISO 3471) : Roll-Over Protective Structure
- Neutral engine start system
- Excellent visibility enhances job site awareness.
- Low emission Komatsu engine with dual element air cleaner
- One key operates the ignition and all machine locks.

PRODUCTIVITY FEATURES

Tight Tail Swing

Operator is able to focus on the work in front of them and worry less about a rear swing impact, even in confined areas with only an **80mm 3"** projection over the tracks.

Closed-center Load Sensing System (CLSS) HydraMind Hydraulic System

When two or more actuators are operated simultaneously, the pressure-compensated CLSS system ensures each actuator works according to its control input, regardless of the size of the load. This gives the operator precise control at all times.

Confined Job Site Advantage

Operator can focus on digging and improve productivity, because they can worry less about obstacles to the rear of the machine, such as parked cars, walls and trees.

PC18MR-3	2,070mm	6'9"
PC20MR-3	2,250mm	7'5"
PC27MR-3	2,515mm	8'3"
PC30MR-3	2,415mm	7'11"
PC35MR-3	2,550mm	8'4"
PC45MR-3	2,830mm	9'3"
PC55MR-3	2,800mm	9'2"

* : When boom swing

Automatic Two-speed Travel

The travel speed selector switch installed on the blade control allows the operator to engage high speed travel. Once engaged the system automatically senses the travel load and shifts between high speed and low speed travel.

Expandable Undercarriage (PC18MR-3)

The PC18MR-3 can pass through narrow space due to narrow width and undercarriage can be expanded for good stability during excavation.

Working Ranges

	mm ft.in.			
	PC18MR-3	PC20MR-3	PC27MR-3	PC30MR-3
Max. digging height	3615 11'10"	4000 13'1"	4480 14'8"	4840 15'11"

Max. drawbar pull	3400 7500	4280 9440	4280 9440

Stability

The MR-3 series offers exceptional lifting capacity and stability in a tight tail machine.

Lifting capacity comparison

	kg lb			
	PC18MR-3	PC20MR-3	PC27MR-3	PC30MR-3
3m 10'	220 480	285 630	370 820	365 800
Rating at max. reach	185 410	240 530	245 540	220 480

	PC35MR-3	PC45MR-3	PC55MR-3
3m 10'	580 1280	995 2190	1005 2220
Rating at max. reach	345 760	505 1110	435 960

The conditions of this comparison are a standard arm, sideways, blade on ground, and at a height of 0m (Ground level).

OPERATOR ENVIRONMENT

Large Entrance and Foot Space

The two-post canopy design allows the MR-3 series to have larger entrance for entry and egress.

Fully Adjustable Operator's Seat

The spacious operator's compartment provides outstanding ride quality. The large operator's seat enhances operator comfort.

Joystick Controls

Pressure Proportional Control (PPC) joystick controls are low effort and provide fine control.

PC18MR-3

Excellent Visibility

The operator's station design allows the operator to maintain 360° field view.

Pattern Change Valve (Optional Equipment)

Pattern change valve allows the operator to change easily between ISO control pattern (ISO 10968) or backhoe control pattern.

Large Operator's Cab (Optional Equipment) (Not Available for PC18MR-3)

The cab provides outstanding foot space. Ergonomic design helps reduce fatigue. The large rear glass provides the operator excellent rear visibility.

Upper-rail Type Sliding Door

Large Rear Glass

Large-capacity Air Conditioner (Optional Equipment) (Not Available for PC20MR-3)

Provides comfortable operator environment throughout the year.

Cup Holder

Large cup holder is standard equipment.

EASY MAINTENANCE

Tilt-up Operator Compartment

Operator's compartment floor tilts forward providing easy access to hydraulic compartments.

Fully Opening Engine Door and Side Cover

Allow easy access for daily checks and regular maintenance.

High Strength X-track Frame

X-track frame is a large hydraulic excavator concept and deters dirt and debris build up saving the operator valuable time when cleaning the machine.

Larger Diameter Swing Pin

Has high durability and maintains suitable clearances between pin and bushing after long-term operation.

Sealed Connector

Sealed connectors are moisture and dust resistant.

O-ring Face Seal

O-ring face seals are highly reliable.

GENERAL FEATURES

Two-post ROPS & OPG Canopy

ROPS (ISO 3471) [Roll-Over Protective Structure]

This canopy meets the requirements of ROPS, with the advantage of a two-post design.

Tie-Downs or Anchor Points

Large tie-downs or anchor points in the track frame and blade allow the machine to be secured quickly for transport.

Chevron-shaped Boom Cylinder Guard and Boom Bottom Working Lamp (Not Available for PC18MR-3 and PC27MR-3)

A chevron-shaped boom cylinder guard* is provided

This design reduces damage to the cylinder caused by interference of the breaker, hitting against the dump vessel, etc.

* The boom cylinder guard of the PC20MR-3 is a reinforced thick plate type.

A working lamp is provided on the boom bottom

A working lamp for work equipment is provided on the boom bottom to prevent damage due to accidental contact.

A Travel Lamp Is Provided Near of Operator's Seat as the Standard Equipment (Not Available for PC18MR-3 and PC27MR-3)

This travel lamp provides an increased visibility both in a night operation and in the travel position.

Neutral Engine Start System

Locks out drives and hydraulics during machine start up.

OPTIONAL EQUIPMENT

Roadliner (Not Available for PC18MR-3 and PC20MR-3)

Replacement is fast, easy and cost efficient as individual shoes are replaced when damaged or worn instead of replacing the entire track.

Steel Shoes with Rubber Pad

Optional Blade

(Bolt-On Cutting edge (B.O.C.) type)

Power Angle Blade (Not Available for PC18MR-3, PC20MR-3 and PC27MR-3)

MR-3 SERIES COMPACT HYDRAULIC EXCAVATOR
